IT Project Scope Form	
Project Title: Entry/Exit system for IIITB	Project Number: 01
Project Manager: Soumya	Anticipated Project Start Date:25th August 2018
Sponsor: Admin	Date Prepared:22nd August 2018
Project Risk Level: medium	Estimated Completion Date:September 25 2018

Team Members:
Core team members:
- Soumya
- Manonmaie
- Akshara

Supporting team members:
- Yashu
- Vaishnavi
- Kavya

Purpose of Project:
   The purpose of this project is to keep track of student, faculty, visitors and working staff's entry and exit into the campus.
   The benefits from this project are
- ensures security
- If a student is missing, you can get to know whether he is in the campus or not ,if not out time can be tracked.
- Associating the visitor with the student so that if anything wrong happens , we know who to question

Background:
   Reasons behind why this project has to be done
- proxy by students as it is manually tracked in the present system.
- Difficult to keep record of each students late entry list.
- Data storage is robust and as medium of storage right now is a book, information can be easily lost.

   Consequences of the project
- Data is not that easily lost.
- Easy maintenance.
- Security guards will not trapped in bribing scandal.

Deliverables:
- Number of students the data base can store will be around 1000.
- In time and out time will be stored in the database for around a month after which it will be automatically deleted.
- Each student will have his/her own past list of late entry
- Association of a visitor with a student.
- Incase if the student looses his/her id card or the bar scanner doesnot work, the project will provide the security guard the facility to type the in/out time.

Stakeholders:
- Administration
- Students of the university
- faculty members
- House keeping staff
- Guards
- Visitors

Resource Requirements:
     Cost Analysing:
- bar code scanning machine and pc at all the three gates.
- Database and a pc(as a server)
- stipend to those who worked in the project.
